Indian Springs Trail

Arizona

The Indian Springs Trail is a wide, gravel path that loops through a portion of the Apache and Sitgreaves National Forests. Beginning

The Indian Springs Trail is a wide, gravel path that loops through a portion of the Apache and Sitgreaves National Forests. Beginning in a meadow, the trail quickly enters a dense forest of pine and fir trees. Portions of the trail run on a former roadbed, while others use the Apache Railway Company's former Maverick Line, which hauled logs to a mill in McNary in the mid-20th century.

Unlike other trails in the Apache and Sitgreaves National Forests, the Indian Springs Trail is limited to mountain bikers and hikers only. The trail is a moderate challenge, as there are a few steep climbs along the way.
