The Boxford Rail Trail is a short, rustic pathway open on a former rail corridor in rural Essex County. Now home to overhead electric

The Boxford Rail Trail is a short, rustic pathway open on a former rail corridor in rural Essex County. Now home to overhead electric wires owned by National Grid, the trail is open via a license granted from the utility to the Town of Boxford for non-motorized recreational use. The grassy service is best navigated with mountain bikes and hiking boots.

The trail is a component of the developing [Border to Boston Trail](#), which will one day span Essex County from Salisbury to Peabody. The entire planned route, including the Boxford Rail Trail, is also a crucial link in the East Coast Greenway, a gargantuan effort to establish a multi-use trail network stretching from Maine to Florida.

Boxford Rail Trail

Massachusetts

States: Massachusetts
