Timucuan Trail

Florida

Along the northeast coast of Jacksonville, sections of the developing Timucuan Trail have been built in Big Talbot Island State Park and

Along the northeast coast of Jacksonville, sections of the developing Timucuan Trail have been built in Big Talbot Island State Park and Little Talbot Island State Park. Both offer beautiful, pristine areas for bird-watching and wildlife viewing, as well as beach access and camping opportunities. On the northern portion of the trail, George Crady Bridge over the Amelia River is safe for pedestrians and bicyclists to use to connect to the [Amelia Island Trail](#).

Eventually, the Timucuan Trail will extend further north to Amelia Island State Park and south to Kathryn Abbey Hannah Park, a distance of 18 miles, all paved. It's part of the larger trail network known as the East Coast Greenway, stretching from Florida to Maine.

Timucuan Trail

Florida

States: Florida

Counties: Duval
