Dayton-Kettering Connector

Ohio

The Dayton Kettering Connector combines a historic rail-trail and bike lanes, and shared road riding for 7 miles between the two

The Dayton Kettering Connector combines a historic rail-trail and bike lanes, and shared road riding for 7 miles between the two municipalities. The off-road portion is 1.9 miles long and sits in the corridor of the Historic Rail Line that once served the NCR factories in Dayton. The rail-trail takes a wooded route through the residential areas of south Dayton, traveling north to the University of Dayton. Beyond this segment, either heading further north into downtown Dayton, or south to Kettering, riders must ride on-road. Signs mark the route of the connector to guide travelers. See related links for details on the on-road portion.
