Santa Cruz Coastal Rail Trail

California

The Santa Cruz Coastal Rail Trail is a paved multiuse rail-trail, and it will eventually run 32 miles along California's Santa Cruz County

The Santa Cruz Coastal Rail Trail is a paved multiuse rail-trail, and it will eventually run 32 miles along California's Santa Cruz County coastline, from Davenport to Watsonville. Following the former Santa Cruz Branch Rail Line corridor, the rail-trail is part of the Monterey Bay Sanctuary Scenic Trail Network—a developing 50-mile multiuse trail running south along the coast from the San Mateo County line to the Monterey County line in Pajaro.

Coastal Rail Trail Segment 7

West of downtown Santa Cruz, 1.2 miles of the eventual 2-mile multiuse path are open to the public. Stretching from Natural Bridges Drive to the intersection of Bay Street & California Street, the trail provides safe connections between neighborhoods, schools, parks, community

facilities, and businesses. The route features 10 bright green bicycle crossings, several new pedestrian crosswalks, signage, and new fencing.

Construction is underway to finish the remaining 0.8 miles and it's expected to open in July 2023. The paved multiuse trail will extend from the current segment endpoint to intersection of Bay Street & California Street to the intersection of Pacific Avenue & Beach Street. Running along the coastal side of the rail line, the trail will be 12-16 feet wide and have ADA compliant running slopes and curb ramps.

The new segment will connect residents with the local beaches and shopping centers. From the beachfront area, the route will meet the next section of the Coastal Rail Trail (Segment 8) and then the San Lorenzo River Parkway Trestle Trail.

San Lorenzo River Trestle Trail

The San Lorenzo River Trestle Trail was the first completed segment of the Coastal Rail Trail. The trail crosses the San Lorenzo River via a separated pedestrian bridge, which runs alongside an active railroad trestle owned by the Santa Cruz County Regional Transportation Commission.

From the intersection of Beach Street & 3rd Street heading east to the intersection of E Cliff Drive & Hiawatha Avenue, the ADA compliant multiuse trail is about 0.1 miles or 340-feet long. The 10-foot-wide elevated pathway has new steel supports, bike friendly railing, a slip resistant surface, and lighting.

At the western end on the Santa Cruz Boardwalk, the trail connects to the [Santa Cruz Riverwalk](#) and the [West Cliff Drive Bicycle Path](#). The bridge has views of the San Lorenzo River and the ocean. On the other side, it connects to the Seabright neighborhood and the eastern segment of the Santa Cruz Riverwalk, forming an important link for bicyclists and

Santa Cruz Coastal Rail Trail

California

States: California

Counties: Santa Cruz

Length: 2.5miles

Trail end points: West Cliff Drive Bicycle Path & Natural Bridges Dr to Pacific Ave & Beach St (Santa Cruz) to 800 Ohlone Parkway to Walker St (Watsonville)

Trail surfaces: Asphalt, Concrete, Metal

Trail category: Rail-Trail
