River Birch Trail

South Carolina

Constructed in 1981 as the city of Spartanburg's first mixed-use trail, the River Birch Trail was in rough shape, with vegetation

Constructed in 1981 as the city of Spartanburg's first mixed-use trail, the River Birch Trail was in rough shape, with vegetation overgrowing the route and the surface cracked and failing, until the city invested in fixing up this short but scenic pathway in 2018. Part of the city's efforts to create a sprawling network of trails called The Daniel Morgan Trail System (or, "The Dan" for short), the River Birch Trail was repaved and expanded to allow it to better serve the community. The trail provides a connection between the city's Main Street and the local high school, giving students a convenient path to walk or bike to school - running through the wooded land behind the school, the path also functions as a nice recreational spot, and connects on the southern end to the natural-surface [Cottonwood Trail](#).

River Birch Trail

South Carolina

States: South Carolina

Counties: Spartanburg

Length: 1.1miles

Trail end points: State Rd. S-42-31 to
Cottonwood Trail

Trail surfaces: Asphalt,Gravel

Trail category: Greenway/Non-RT

Trail activities: Bike,Walking

Parking & Trail Access
