Southeast Connector Trail

Iowa

Southeast Connector Trail

Iowa

Named for the major project the city of Des Moines has undertaken to improve transportation and connectivity along the Martin

anchor for future development efforts.

Named for the major project the city of Des Moines has undertaken to improve transportation and connectivity along the Martin Luther King Jr. Parkway in the southeastern section of downtown, the Southeast Connector Trail ensures that cyclists and pedestrians share in the benefits from all the city's work. The trail runs along the side of the busy road, connecting businesses and neighborhoods along the route with a series of trails at its western terminus, where the Raccoon River meets the Des Moines River. Trail users can continue north into downtown Des Moines along the river via the [John Pat Dorrian Trail](#), or explore some of the city's premier parks and natural spaces along the Raccoon River via the [Meredith Trail](#). While the Southeast Connector Trail might not be the most scenic of sidepath trails, it provides a crucial link in the area's trail network and provides an

Southeast Connector Trail
