Dakota Dunes Trail

South Dakota

Dakota Dunes Trail

South Dakota

The Dakota Dunes Trail is a paved trail for cyclists and pedestrians that runs through the unincorporated community of Dakota Dunes,

and provides convenient access to the neighborhood Prairie Boulevard Park. Due to its proximity to the riverbank, the eastern portion of the trail is susceptible to flooding, so be sure to check with the local trail manager for up-to-date conditions.

The Dakota Dunes Trail is a paved trail for cyclists and pedestrians that runs through the unincorporated community of Dakota Dunes, south of North Sioux City in the southeastern corner of South Dakota. The trail runs through flat and open fields that border Interstate 29 and then the Big Sioux River, before heading into The Point Nature Preserve in the east - this wooded stretch of land offers trail users the rare opportunity to travel to the point where three states meet, as the pathway brings you right near the Big Sioux Bend, the confluence of the Big Sioux and Missouri Rivers and the place where the borders of Iowa, Nebraska, and South Dakota all meet.

The northwestern part of the trail lacks the scenic remove of the riverfront segment, but does help to connect neighborhoods within the community of Dakota Dunes,
