The EWEB Path runs for a little under three miles along a utility corridor in a residential part of Springfield, Oregon. The trail, which gets its name from the Eugene Water & Electric Board utility company, spans from Pioneer Parkway in the west (and the [Rosa Parks Path](#) that runs alongside that road) to a water filtration plant in the east, offering access to a number of neighborhoods along the way. The trail provides a safe and convenient off-road route to Elizabeth Page Elementary School and the adjacent Page Park, perfect for families in the adjoining neighborhoods, and also serves as a popular local exercise route, giving residents a great place to walk their dogs, jog, or enjoy a leisurely bike ride.
