Roosevelt Boulevard Path

Oregon

Spanning almost two miles between Danebo Avenue and Maple Street in Eugene, the Roosevelt Boulevard Path follows the northern

Spanning almost two miles between Danebo Avenue and Maple Street in Eugene, the Roosevelt Boulevard Path follows the northern side of its namesake roadway through a series of residential neighborhoods. The asphalt trail is flat and wide, with a row of trees providing a bit of privacy and separation from the traffic along the street.

While lacking in some of the scenic appeal that other trails around Eugene possess, the Roosevelt Boulevard Path serves as a useful community recreation path, as well as a key part of the area trail network, helping to connect residents with other trails like the [Randy Pape Beltline Path](#) and the [Fern Ridge Path](#).
