The Fault Line Trail in Mission Bend is so named because of the geologic fault lines found in this part of the Houston area, formed millions of years ago during the formation of the Gulf of Mexico. The trail sits nestled between the houses in a residential subdivision, ending right across the street from an elementary school. Concrete surfacing means that the trail can host pedestrians (and their dogs) and cyclists alike, though due to its short length it's more likely to be used for the former. This suburb of Houston is also home to nearly 7 more miles of non-motorized trails.

Fault Line Trail

Texas

States: Texas

Counties: Fort Bend

Length: 0.6miles

Trail end points: Los Altos Drive to Soneto Drive

Trail surfaces: Concrete

Trail category: Greenway/Non-RT
