Mohansic Trailway

New York

The Mohansic Trailway is a rail-trail providing an important link between the North County Trailway and the Franklin Delano

mile long North Country Trailway. It consists of an unpaved path, a 564-foot boardwalk over wetlands, and three bridges. The surface can get muddy and there is a 20-foot steep section at one point. For ease of access, the city laid gravel from the SR 118 entrance to the first bridge. It runs through the southeast corner of FDR State Park, concluding at Mohansic Avenue East.

The Mohansic Trailway is a rail-trail providing an important link between the [North County Trailway](#) and the Franklin Delano Roosevelt State Park. The trailway occupies a short-lived spur of the New York and Putnam Railroad that was constructed in 1911 and abandoned 6 years later. The spur was meant to connect from Yorktown Heights to the psychiatric hospital being constructed near Lake Mohansic, but that effort, plagued by controversy, was dropped and the area turned into a state park in 1918.

The spur had two branches, one heading north and to the hospital and one heading west. It is the one heading west that became the Mohansic Trailway. Volunteers put in over 1300 hours of work to make the trail a reality. The trail begins in Yorktown, a short distance from the 20-

Mohansic Trailway
