Jefferson County Interurban Trail

Wisconsin

Jefferson County Interurban Trail

Wisconsin

The Jefferson County Interurban Trail is a paved multi-use trail that follows a former interurban rail line for what will eventually be

east to the shores of Lake Michigan, the trail connects to trails such as the [Lake Country Recreation Trail](#) in Waukesha County and the [Hank Aaron Trail](#) in Milwaukee. There is an abundance of wildlife and floral to observe. The route passes by marshes, woods, fields, ponds, and a river.

The trail is flat, wide, and paved, thus making it more accessible for those using mobility aids.

The Jefferson County Interurban Trail is a paved multi-use trail that follows a former interurban rail line for what will eventually be almost eleven miles through Jefferson and Waukesha County. After the interurban railway that ran from Milwaukee to Watertown in the early 1900s was shuttered, the path became a utility corridor for We Energies. A licensing agreement with the company has allowed the county to renovate the existing We Energies right-of-way corridor in order to create this paved 10-foot-wide multi-use trail.

6.9 miles are open for use between Watertown and Oconomowoc. The trail offers opportunities for alternative modes for commuting, as well as providing a beautiful setting for recreational activities. Running from the northern end of the Glacial River Trail in Watertown

Jefferson County Interurban Trail

Wisconsin

States: Wisconsin

Counties: Jefferson

Length: 6.9miles

Trail end points: Clark St. (Watertown) to
County Road F
