**Biscayne-
Everglades
Greenway**
Florida

Biscayne-Everglades Greenway

Florida

Once completed, the Biscayne-Everglades Greenway will be the first greenway to connect two national parks, Biscayne Bay

on shore. The park offers a variety of recreational options, including camping, hiking, snorkeling, and paddling.

The open portion of the trail uses the South Florida Water Management District right-of-way and winds its way alongside canals in between various subdivisions. Both bike and electric bikes can be used on the trail, and can be rented at [Electribike](#).

Once completed, the Biscayne-Everglades Greenway will be the first greenway to connect two national parks, Biscayne Bay National Park and Everglades National Park. The entire trail will stretch 42 and pass through the city of Homestead, but for now, Section 1 of the trail is a short but scenic, 3.2 mile stretch from E. Mowry Dr. to Tallahassee Rd is open.

Everglades National Park protects a tropical wilderness of wetlands and forests, and a number of animal species including the Florida panther, American crocodile, West Indian manatee, and sea turtles. In the park, visitors can enjoy camping and numerous nature trails.

Biscayne National Park preserves the waters of Biscayne Bay, its barrier reefs, and mangrove forests and swamps

Biscayne-Everglades Greenway

Florida

States: Florida

Counties: Miami Dade

Length: 3.2miles

Trail end points: E. Mowry Dr to Tallahasee Rd.
