## Mill Valley/Sausalito Multiuse Pathway

California

*The Mill Valley/Sausalito Multiuse Pathway is a convenient connection between neighborhoods, schools, shopping,*

Although the trail is rather short, it and the nearby shoreline and art galleries are all worth exploring. The best feature of the trail is its views of the bay, where it passes through a scenic wetland marsh. You will see many species of birds here, including the marsh wren, brown pelican and maybe even a raptor, if you are lucky. Be sure to enjoy the houseboats of Sausalito when you cruise by. Parking is available at many of the adjoining business areas and at Sycamore Avenue. The trailhead has a public restroom.

The trail connects to the short [Charles F. McGlashan Pathway](#) at Coyote Creek, allowing trail users to enjoy pleasant views of the adjacent waterway. Most of the Mill Valley/Sausalito Multiuse Pathway is also a component of the [San Francisco Bay Trail](#), and you will see signs advertising the trail as such. The system is a colossal effort to create a 500-mile multiuse trail encircling its namesake bay.

The Mill Valley/Sausalito Multiuse Pathway is a convenient connection between neighborhoods, schools, shopping, restaurants, and both a skate and dog park. The trail is paved with a few wooden bridges over marshlands and inlets. There is also a gravel shoulder that is used by equestrians.

Overall, the trail gets a good mix of cyclists, walkers, joggers and skaters, so brush up on the rules of the trail before you begin. You can also access the trail by way of the ferry in Sausalito, making it possible to connect with other opportunities in San Francisco and Marin County. You could even rent a bike in San Francisco and take the ferry to Sausalito. This can make for a great day of exploring the region.

# Mill Valley/Sausalito Multiuse Pathway

California

**States:** California

**Counties:** Marin

Length: 3.7miles

**Trail end points:** 0.2 mile north of Vasco Ct & Underhill Rd (Mill Valley) to Harbor Dr & Bridgeway (Sausalito)
