Delyte W. Morris Trail

Illinois

The Delyte W. Morris Trail lies entirely on the campus of Southern Illinois University, Edwardsville (SIUE). It is named for the

There's little opportunity to see the campus along the trail. Much of the trail is covered by heavy woods; much has embankments on both sides that prevent seeing beyond. The trail's mostly peaceful and solitary, except for school days and activities on the weekends.

The Delyte W. Morris Trail lies entirely on the campus of Southern Illinois University, Edwardsville (SIUE). It is named for the university's president at the Carbondale campus in the 1960s who helped create the Edwardsville campus.

Students are the largest user group for this trail, since it connects various campus facilities and housing on the north side of the university. The neighboring city of Edwardsville can be reached by road-trail combination routes east from campus. And the trail's westward intersection with the [MCT Bluff Trail](#) connects users to the university athletic fields. Since this trail forms no long circuit with the larger MCT network, traffic generally moves at a slower pace.

Delyte W. Morris Trail

Illinois

States: Illinois
