The Redstone Rail Trail is built on the former New York, New Haven & Hartford Armory Branch, which in turn is a former branch line of the New York & New England RR. Its name comes from the numerous red sandstone quarries in the area that gave the town its industrial beginnings.

On its northern end, trail-goers can view the historic Old East Longmeadow Rail Station, as well as a modern point of interest, the East Longmeadow rotary, an intersection where seven streets come together with no traffic signals, giving the spot the notorious reputation as one of the most dangerous stretches of roadway in the world.

Redstone Rail Trail

Massachusetts
