Haywire Grade Trail

Michigan

Opened in 1970, the Haywire Trail was the first rail-trail in Michigan; it follows the former Manistique and Lake Superior

Opened in 1970, the Haywire Trail was the first rail-trail in Michigan; it follows the former Manistique and Lake Superior Railroad. The multi-use pathway is primarily used by ATV riders in summer and snowmobilers in winter. The trail is also open to mountain biking, hiking and horse riding.

The trail runs from M-94 south of Shingleton to the Water Intake Plant in Manistique on a surface of gravel, dirt and sand. It also includes ballast from the old rail bed upon which it runs, making travel difficult for bikes and horses in some spots.

In preparation for the trail's 50th anniversary in 2020, improvements to the trail are underway, including the addition of mile markers.

Haywire Grade Trail

Michigan

States: Michigan

Counties: Alger, Schoolcraft
