## Kent Trails Michigan

*An easy, flat, and well-maintained trail system, the Kent Trails provide transportation and access to nature in the bustling,*

An easy, flat, and well-maintained trail system, the Kent Trails provide transportation and access to nature in the bustling, second-largest metropolitan area in Michigan. The southern trail section passes through residential areas intermingled with woods, creeks, and fields, while the northern section runs along Grand Rapids' namesake river through a large urban park featuring wetlands, recreational areas, and a historic bridge. The trail system provides connectivity to numerous other trails.

### About the Route

The northern section of the trail leaves off from its northeasternmost endpoint at Butterworth St. SW near John Ball Park. The trail heads southwest and after about a mile, there are options to travel along either side of the

Grand River as a scenic truss bridge carries trail users across the river here.

Shortly after, the trail along the northern bank of the trail enters Millennium Park, an impressive 1,500-acre park, and one of the most scenic points along the trail. As the trail approaches SR 11, it continues west of here, only along the south bank of the Grand River until reaching a trail end at Baldwin St.

At the trail along the southern bank of the Grand River, just where the route passes Hopewell Indian Mounds Park, a southern section of the trail leaves off by crossing the Grand River and heading south. This section is less wooded than the northern route of the trail, with the northernmost part of this section nestled right by Ivanrest St SW.

After the route moves east along Prairie St. SW and then meanders south again through a small wooded corridor. When the trail passes Paul B. Henry Fwy, there is a trail tunnel that takes trail users under the highway.

At 76th St SW, the southern section of the trail splits into two trailheads, one of which travels east along 76th St. and then south through a small wooded area before reaching Douglas Walker Park. Along the other southern end of the trail, this route continues south along the old rail corridor before reaching another southern endpoint along 84th St.

### Connections

At the trail's northwestern trailhead, it connects to the [Butterworth Trail](#).

In multiple spots in Millennium Park, the trail connects with the [Fred Meijer Millennium Trail](#).
