Platte River Connection

Nebraska

The Platte River Connection is a short, but critical, route that will one day link the vast trail systems of the two most populous

The Platte River Connection is a short, but critical, route that will one day link the vast trail systems of the two most populous Nebraskan cities, Lincoln and Omaha. The trail's centerpiece is the 1,714-foot-long Lied Platte River Bridge, a converted Rock Island Railroad trestle that offers picturesque views of the water.

On the south side of the Platte River, the trail provides a tree-lined entrance to the rural community of South Bend. On the north side of the river, the trail connects to Springfield's [MoPac Trail](#).

The Lied Bridge was damaged by flooding in 2019, but has been repaired and reopened for public use as of July 2021.

Platte River Connection

Nebraska

States: Nebraska

Counties: Cass

Length: 1miles

Trail end points: 328th St just north of
Kimberly Dr to State Route 31 west of S 196th Cir
