Old Mine Railroad Trail

New York

Fahnestock State Park is a relatively undiscovered gems in the New York State Park System. Located a few miles east of Cold Spring

Fahnestock State Park is a relatively undiscovered gems in the New York State Park System. Located a few miles east of Cold Spring Village on Rt. 301 (Main Street), the park jurisdiction was recently expanded to include almost 10,000 acres of undeveloped land with an extensive network of trails maintained by the state and the New York-New Jersey trail conference.

Ridges running from southwest to northeast dominate the terrain. Between them are several lakes and ponds and numerous wetlands and streams. Although there are occasional steep sections, there are no long or difficult climbs, and for the most part grades are moderate.

The network of trails in the park makes it possible to plan a great variety of outings, ranging from easy rambles for

families with children to strenuous all day hikes. Pick up a box lunch and enjoy the back country experience less than 60 miles from one of the largest cities in the world. Just remember to pack out what you pack in so others may enjoy the unblemished scenery.

Trails are blazed with round plastic discs of various colors or rectangular painted marks. A double blaze, one above the other, indicates a turn with the upper blaze offset in the direction of the turn. A triple blaze in a triangle pattern indicates the start or end of a trail.

The trails are restricted to day use only. Camping or making fires is not permitted. No vehicles are permitted on any hiking trails. This includes mountain bikes as well as all terrain vehicles (ATVs), motorcycles and snowmobiles.

NOTE: The part of the Old Mine Railroad Trail from the Appalachian Trail to the dam at Hidden Lake is now closed. The trail has been rerouted from the 3 Lakes Trail over the dam to connect with the remaining part of the trail. The dam at Hidden Lake will be repaired and raise the water level, possibly covering the now closed section.
