Overview

The Shelby Bottoms Greenway is a multi-use trail that runs along the Cumberland River in the East Hill section of Nashville.

Shelby Bottoms is a 950-acre preserve and floodplain along the Cumberland River, and the greenway winds its way through this park and preserve.

About the Route

Numerous unpaved trails loop through the forest and open spaces throughout the Shelby Bottoms area. The main trail is 4.5 miles, one way, while additional spur trails increase the mileage to 6.4 miles. The trail also runs through Shelby Park, adjacent to the Shelby Bottoms natural area, which offers a public golf course, sports fields, Sevier Lake (popular for fishing), and a dog park.

Starting at the southern end of the trail near the park's Nature Center. As the trail winds north, there is an observation deck near Hidden Pond. At the northern end of the trail, a fantastic pedestrian bridge connects the Shelby Bottoms Greenway to the Stones River Greenway. Sections of the trail also pass the Old Farm Pond and Cornelia Fort Air Park.

Connections

By Shorebird Pond, the Shelby Bottoms Greenway, the trail connects to the <u>Stones River Greenway</u>.
