Mill Creek Greenway Trail

Ohio

The growing Mill Creek Greenway Trail follows one of Cincinnati's most important urban waterways and will one day stretch 14 miles

The growing Mill Creek Greenway Trail follows one of Cincinnati's most important urban waterways and will one day stretch 14 miles through the city's northern neighborhoods. Groundwork Cincinnati is a community-based nonprofit that works to develop the trail and maintain it.

Currently, the trail is open in two short, disconnected segments. The southern section is nearly 2 miles long through mostly light industrial development. A highlight of the route is Salway Park, which boasts some excellent habitat restoration projects as well as a superb public art installation. Farther northeast, another mile of trail reaches Caldwell Park. Both sections are paved.
