Hoosic River Greenway

New York

The Hoosic River Greenway spans 2.5 miles along the river's east bank through the Village of Hoosick Falls. The gravel pathway

The Hoosic River Greenway spans 2.5 miles along the river's east bank through the Village of Hoosick Falls. The gravel pathway follows the former route of the Boston Hoosac Tunnel & Western Railway, which was formed in 1878. Today, the trail provides a pleasantly wooded corridor for enjoying the outdoors and also accessing the village's shops and restaurants. For anyone needing some inspiration for their workout, there is a fitness station as well as signs along the greenway, each describing a different physical activity.

Hoosic River Greenway

New York

States: New York

Counties: Rensselaer

Length: 2.5miles

Trail end points: Waterworks Road to Sewer Plant Road

Trail surfaces: Gravel

Trail category: Rail-Trail
