Brookline Rail Trail

New Hampshire

The Brookline Rail Trail winds through the New Hampshire woods and passes by several small bodies of water, including the Potanipo

to it through the woods until it meets the 3-mile [Granite Town Rail Trail](#).

The Brookline Rail Trail winds through the New Hampshire woods and passes by several small bodies of water, including the Potanipo Pond. The rail-trail has two segments, known as the Brookline Rail Trail (the main trail) and the Brookline Rail Trail (Tevya Section). Both are about 2 miles long for a total of 4.5 miles. Please note that during the summer the Tevya Section is closed to the public for use by a local camp. Horseback riding, cross-country skiing, and snowmobiling are possible on the main Brookline Rail Trail segment.

At the Tevya section's southern endpoint, it is possible to connect with the 1.5-mile [Potanipo Rail Trail](#) via either a rough off-road trail or the bike path that runs alongside Route 13. Further north, the main segment of the Brookline Rail Trail picks up off Route 13, running parallel
