Taylor SteelWorkers Historical Greenway

New Jersey

DESCRIPTION: The Created by Union Forge Heritage Association in 2007, Taylor SteelWorkers Historical Greenway is a 7 mile trail

DESCRIPTION: The Created by Union Forge Heritage Association in 2007, Taylor SteelWorkers Historical Greenway is a 7 mile trail that winds its way through High Bridge criss-crossing a number of historical sites and beautiful scenery. This is the perfect trail for wildlife watchers and history buffs alike. Follow the Columbia Trail for approximately 1/4 mile looking on the Right for the trailhead gate that includes a sign and entrance for the famous Lake Solitude Dam. Heading in a southeasterly direction from the Columbia Trail, this trail proceeds to the historic structures of the TISCO Complex and then onto a 100 year old truss bridge. After crossing the bridge, the trail proceeds north along the South Branch of the Raritan towards the Lake Solitude and Lake Solitude Dam (circa 1858), Solitude House Museum and the Union Iron Works ruins (circa 1742). From there the trail continues

on to the entrance of the Nassau Trail, works its way to Springside Farm (Springside Lane, High Bridge) and its adjoining woods and proceeds from there to its end at Lord Amesbury's Furnace, circa 1752, located in Clinton Township. For more information about this trail contact Union Forge Heritage Association at 908-638-3200

WILDLIFE: Bald Eagles are a familiar sight in the region. They often are easier to spot in winter when trees are bare of leaves. Check the trees along the trails; seasonal sightings include Brown Creeper, Eastern Phoebe, Ruby- and Golden-crowned Kinglets, Blue-gray Gnatcatcher, Palm, Pine and Yellow-rumped Warblers and Yellow-throated Vireo. Look a little deeper into the woods for Hermit and Wood Thrushes, Veery, Ovenbird and Red-eyed and Blue-headed Vireos and Pileated Woodpecker.

DON'T MISS: Several miles north of High Bridge, the Columbia Trail passes over Ken Lockwood Gorge Bridge, built 80 feet above the gorge floor. This steel span was built in 1930 to replace the original wooden trestle bridge, which was the site of a memorable 1886 train wreck.

Taylor SteelWorkers Historical Greenway

New Jersey

States: New Jersey

Counties: Hunterdon

Length: 7miles

Trail end points: Main Street Commons (High Bridge) to Amesbury Furnace (Clinton Township)

Trail surfaces: Crushed Stone,Dirt,Gravel

Trail category: Greenway/Non-RT
