Pike River Pathway

Wisconsin

The Pike River Pathway is a paved, multiuse trail that parallels the river after which its named through meadows, fields, woods, and

South of the trail's loop around a pond, the Pike River Pathway connects to the [Racine-Sturtevant Trail](#), which heads east into Racine and links the pathway to a fantastic trail network that runs south all the way to Chicago.

Continuing south, the Pike River Pathway crosses Durand Ave/Highway 11, where there is a HAWK signal system for pedestrians crossing the busy highway. After crossing Braun Road, the trail continues south to 1st Street/Highway KR, where it connects to the paved [KR Trail](#) that begins in Somers at the county line.

The Pike River Pathway is a paved, multiuse trail that parallels the river after which its named through meadows, fields, woods, and residential areas in the Village of Mount Pleasant, WI.

From its north end on Old Spring Road, the trail heads south through meadows and lightly wooded areas. After the access point at Wendi Court & Timmer Lane, the trail runs along both sides of the reconstructed Pike River through the Village of Mount Pleasant and unincorporated parts of Racine County. The path is convenient to several neighborhoods in the community, giving residents a path for recreation and exercise practically in their backyards. Birds, frogs and other wildlife call the adjacent wetlands home, making it a peaceful place to get in touch with nature.
