Lakes Basin Path

California

The Lakes Basin Path is a stunningly gorgeous trail that stretches from downtown Mammoth Lakes to a series of lakes to the

Lake, Lake Mamie and the Twin Lakes—are all popular recreation destinations, and campgrounds nearby accommodate overnight guests.

The Lakes Basin Path is a stunningly gorgeous trail that stretches from downtown Mammoth Lakes to a series of lakes to the community's south. Paralleling quiet Lake Mary Road for its entire route, the trail weaves in and out of dense woodlands as it climbs 1,000 vertical feet from north to south. Cyclists must be careful to control their speed on the downhill journey back to Mammoth Lakes.

Like many of Mammoth Lakes' trails, the Lakes Basin Path features smooth pavement and a stunning backdrop of mountains, including the Sherwin Range to the north and Mammoth Mountain to the west. The area is justifiably popular with downhill skiers, and the Lakes Basin Path uniquely passes via a tunnel under a ski slope at one point.

The lakes near the trail's southern endpoint—Horseshoe

Lakes Basin Path

California

States: California

Counties: Mono

Length: 5.2miles
