Venta Spur Trail

California

The Venta Spur Trail travels along the narrow corridor of a former rail spur that began serving the Frances Packing House—a major

The Venta Spur Trail travels along the narrow corridor of a former rail spur that began serving the Frances Packing House—a major citrus processing facility—in 1916. Today, the popular trail serves the local neighborhoods. The western portion is shaded and lushly landscaped, while the eastern portion leaves the former rail corridor to parallel neighborhood roads.

The trail cuts across much of Irvine, from the Peters Canyon Trail to State Route 133 near Orange County Great Park. At Jeffrey Road, the trail also connects to the developing Jeffrey Open Space Trail, which extends north to the outer fringes of Irvine.

Venta Spur Trail

California
