Calumet Trail
Indiana

Calumet Trail

Indiana

Overview The Calumet Trail traverses the south side of the Indiana Dunes National Lakeshore, a unique ecosystem of forest, marsh,

including a unique and unexpected sight: the Bailly Power Generator.

The 4.5-mile section between County Line Road and Mount Baldy was newly paved in 2024, with plans to have the full 9-mile trail completely paved by 2025.

Connections

At its western end, the trail connects with the [Porter Brickyard Trail](#), a mostly on-route section that traverses the park north-south. Where the Calumet Trail passes the Dune Park station of the South Shore Line, it also connects with the [Dunes Kanakee Trail](#), which takes trail users to Porter Beach.

Overview

The Calumet Trail traverses the south side of the Indiana Dunes National Lakeshore, a unique ecosystem of forest, marsh, dunes, and beach along Lake Michigan.

About the Route

The dirt and crushed limestone Calumet Trail stretches between two interesting natural features: the Cowles Bog, an 8,000-year-old marsh, and Mount Baldy, a 123-foot-tall sand dune.

The route parallels the South Shore Rail Line, which carries passengers from Chicago to South Bend and passes through residential and commercial areas,

Calumet Trail
