East 224 Connector Trail

Utah

The East 224 Connector Trail provides a convenient route through South Snyderville Basin from Willow Creek Park to the Redstone

The East 224 Connector Trail provides a convenient route through South Snyderville Basin from Willow Creek Park to the Redstone Shopping Complex. It meanders north along the former Denver and Rio Grande Western Railroad right-of-way for just over a mile, then parallels State Route 224 before approaching the Swanner Nature Reserve, a scenic wetland and meadow habitat with an award-winning educational facility. The path is packed dirt and stone with two boardwalk segments through wetlands.

The trail connects to the asphalt-surfaced [224 Connector Trail](#) at its northern end and the [McLeod Creek Trail](#), [Split Rail Trail](#) and [Willow Creek Trail](#) to the south.
