Nimitz Way links Tilden Regional Park and Wildcat Canyon Regional Park via the ridge between Wildcat Creek and the San

Nimitz Way links Tilden Regional Park and Wildcat Canyon Regional Park via the ridge between Wildcat Creek and the San Pablo Reservoir on the northern outskirts of Berkeley. The paved 4-mile trail utilizes an access road to a missile base that was decommissioned in the 1970s.

The trail is not very steep, with a typical grade of 3 percent for most of the trail. Along the way, enjoy scenic views of the reservoir, the San Francisco Bay and Mount Diablo. You may even see a hawk, golden eagle or other raptor. From the trail's western end, hikers, cyclists and horses alike can continue even farther west on the unpaved San Pablo Ridge Trail and Mezue Trail.

Nimitz Way

California

States: California
