## South Omaha Trail

Nebraska

*The South Omaha Trail serves as an important connector for the city, linking the Keystone Trail, Karen Park, Karen Western*

The South Omaha Trail serves as an important connector for the city, linking the [Keystone Trail](#), Karen Park, Karen Western Elementary School and the [Field Club Trail](#). The paved pathway is built on a former Chicago & North Western rail line and has a slight uphill grade when running from west to east.

An old train bridge that crosses S. 60th Street (just south of F Street) has been incorporated into the trail and a considerable amount of wildlife can also be seen from the pathway, including deer, woodchucks and many types of birds.
