Conservation District Trail

Illinois

North of the Sangamon River crossing, the Conservation District Trail closely follows Stevens Creek through a flat and dense

North of the Sangamon River crossing, the Conservation District Trail closely follows Stevens Creek through a flat and dense wetlands forest on the west end of Decatur. South of the river, the trail ascends two steep grades to end at the Rock Springs Environmental Center. Along the way, it goes through deciduous woodland and passes a small lake, a pine forest, and restored native prairie. There are many things to do and see at the Rock Springs Nature Center; see the link under "Explore Related Content."

At the north end of the trail, you can continue your journey on two scenic trails: the 4-mile [Stevens Creek Bikeway](#), which heads north, or the [Fairview Park Trail](#), which runs nearly 2 miles eastward.

Conservation District Trail

Illinois

States: Illinois

Counties: Macon

Trail surfaces: Asphalt

Trail category: Greenway/Non-RT

Trail activities: Bike,Inline

Skating,Fishing,Wheelchair

Accessible,Walking,Cross Country Skiing

Parking & Trail Access

There is convenient access to the north end of the trail from its connection to the Fairview Park Trail, but the only direct trail access is at the Rock Springs complex (3939 Nearing Lane) on the south end. To get to the main parking lot there, take State Route 48 southwest from Decatur; turn right onto Rock Springs Road (County Road 10), and right again onto Brozio Lane. There you will come to the park entrance on the left; continue around the access road until it ends at the parking lot.
