The Fairview Park Trail, in western Decatur, traverses the large and beautiful Fairview Park and connects (via roadway) to the park's various attractions: an aquatic center, lake, gardens, pavilions, tennis courts, ball fields, skate park and dog park. The trail is mostly tree-covered and flat, except for two short, steep grades. In the west end of the park, the trail is built in part on a former interurban railway corridor of the Illinois Traction System. The trail also crosses and briefly passes sections of scenic Stevens Creek.

On the western end of the trail, you can connect directly to the 4-mile [Stevens Creek Bikeway](#) or the 2-mile [Conservation District Trail](#).

Fairview Park Trail

Illinois

States: Illinois

Counties: Macon

Length: 1.7miles

Trail end points: Fairview Ave./SR 48 at
Fairview Park to Conservation District Trail at
W. Main St.

Trail surfaces: Asphalt

Trail category: Rail-Trail

Skating, Wheelchair Accessible, Walking, Cross
Country Skiing

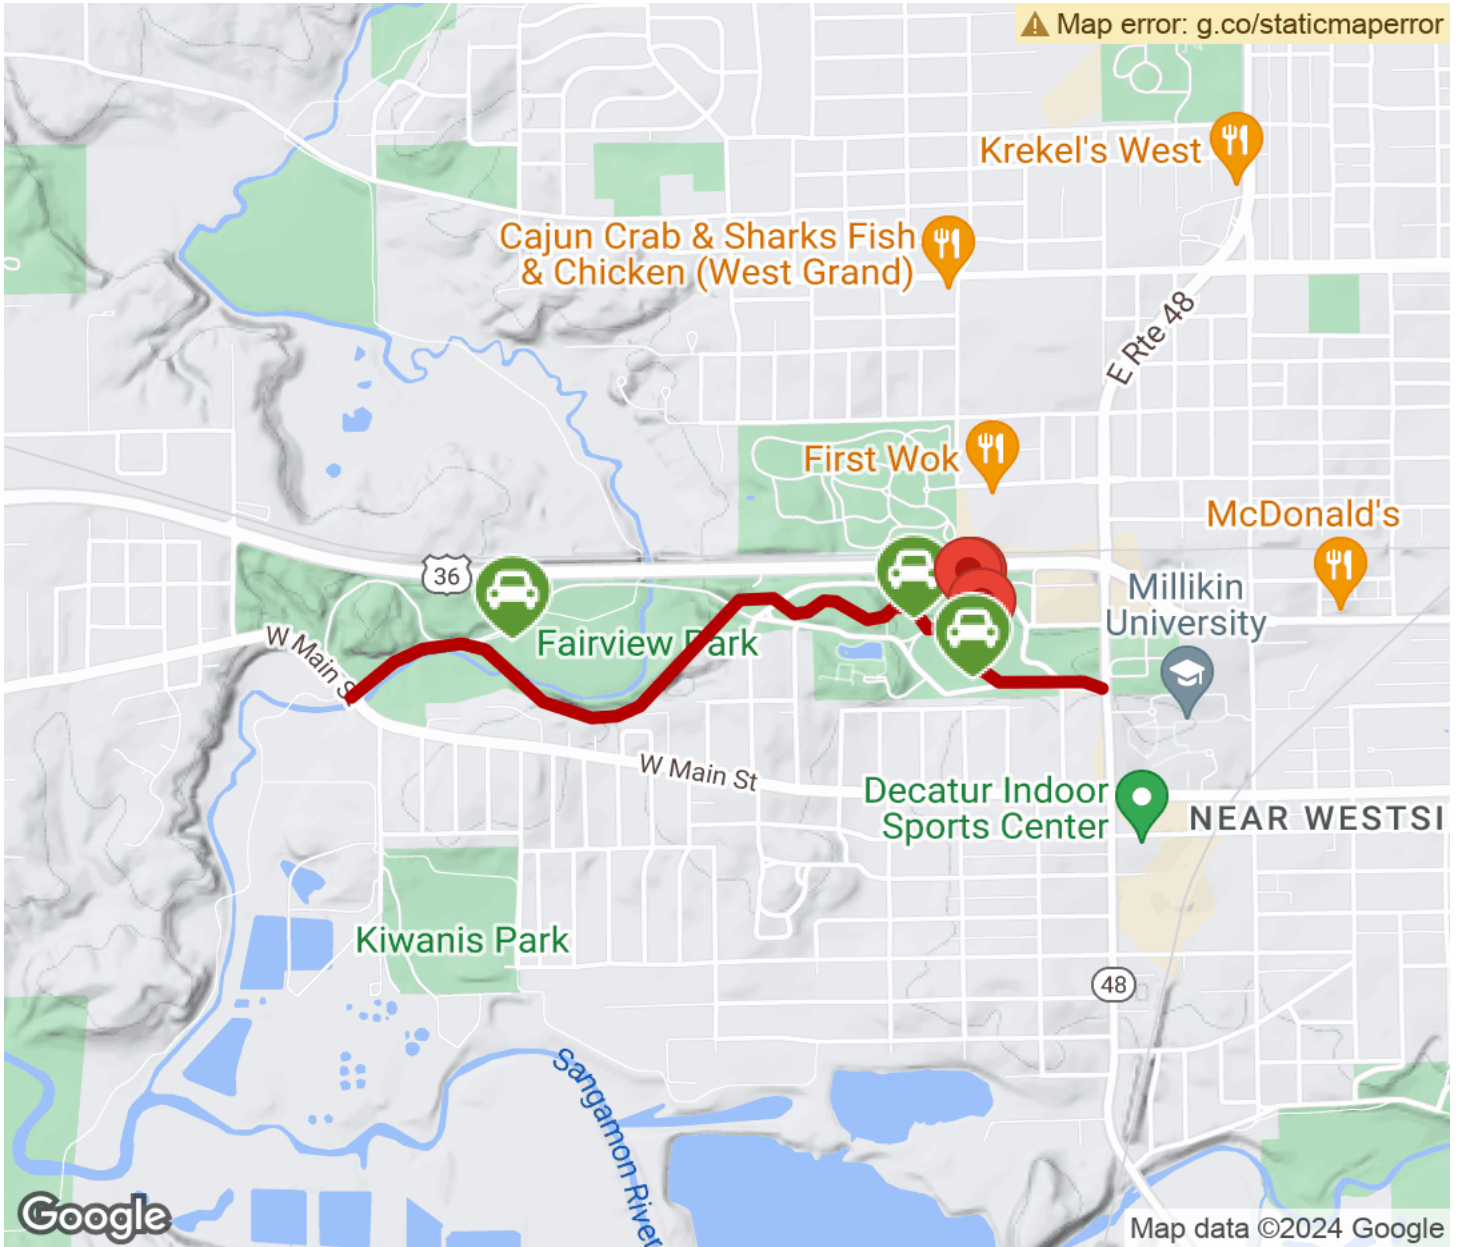

Parking & Trail Access

Access Fairview Park from Fairview Avenue, either via Eldorado Street or one block south, just west of Millikin University. There's parking on the drive shortly after entering, and several parking lots throughout the park. A convenient area with various lots is in the west end of the park, near the trail's connections to the Stevens Creek Bikeway and the Conservation District Trail.
