The Wilden Avenue Trail stretches for roughly 3 miles from the northern Goshen city limits to the community's downtown. In the north, the trail is a direct continuation of the [MapleHeart Trail](#) (and is occasionally referred to as part of that trail), which parallels active railroad tracks to the city of Elkhart. The trail is also an integral component in Goshen's Maple City Greenway network, which consists of 23 miles of open bike paths and trails.

The trail is immediately adjacent to Wilden Avenue—hence its name—as it continues south from Wakefield Road to Indiana Avenue. The route then cuts through and around Oakridge Park and Oakridge Cemetery before following Rock Run Creek for a short distance to just past N. Main Street. At the trail's eastern end, it directly links with the much longer [Pumpkinvine Nature Trail](#).
