Green Mill Run Greenway

North Carolina

Green Mill Run Greenway travels across Greenville, connecting important city attractions and institutions such as East Carolina

to access shops and restaurants, as well as the Blount Recreational Sports Complex.

Green Mill Run Greenway travels across Greenville, connecting important city attractions and institutions such as East Carolina University and Greensprings Park. About midway along the route, you'll traverse Elm Street Park, which is packed with opportunities for fun; there, you'll find athletic fields, tennis courts, playgrounds, and lawn games.

At the trail's eastern end, you can connect to the [South Tar River Greenway](#), which continues about 5 miles through pleasantly wooded scenery.

The trail is actively growing and, in March 2017, it was extended just over a mile southwest to Arlington Boulevard and Evans Street. This will connect the trail to a commercial area of the city, so residents can use the route

Green Mill Run Greenway

North Carolina
