Five Mile Creek Greenway

Alabama

The Five Mile Creek Greenway will eventually extend over 27 miles through Central Alabama and connect the communities of

Heading north from the trail's previous westernmost trailhead (4250 Powder Mill Rd, Mt Olive), the route meanders through trees and scrub vegetation until it ends at Newfound Creek in the City of Brookside.

The Five Mile Creek Greenway will eventually extend over 27 miles through Central Alabama and connect the communities of Graysville, Brookside, Gardendale, Fultondale, Tarrant, and Center Point.

A significant step in making this vision a reality was achieved in 2018, the Five Mile Creek District purchased 16.5 miles of rail corridor from CSX Transportation. At present, 8.25 miles of that corridor have been completed and are open to the public. The first three miles stretch between Black Creek Park in Fultondale and Shady Grove Road in Gardendale. Beautiful trees and a creek greet visitors to the trail. Users can also enjoy various amenities at the park. Baseball and softball lovers can hit the batting cages. There's a playground for the kids and a dog park for your four-legged furry friends.

Five Mile Creek Greenway

Alabama

States: Alabama

Counties: Jefferson
