Fulbright Spring Greenway

Missouri

Taking residents and visitors through the natural areas in the north of Springfield, the Fulbright Spring Greenway is a hidden gem of

Taking residents and visitors through the natural areas in the north of Springfield, the Fulbright Spring Greenway is a hidden gem of Ozark's Greenway System. The trail was initially named after the waterway closest to it, South Dry Sac River. The trail is 6 miles long, in 2 separate segments: the longest segment runs (west-east) from Ritter Springs Park (Scott Rd.) along South Dry Sac River until ending along E Farm Rd. 100.

The secondary, shorter section of the trail runs along Valley Water Mill Park and slightly north further along South Dry Sac Run.

Fulbright Spring Greenway

Missouri
