Harriet Island Regional Park Trail

Minnesota

Harriet Island Regional Park offers a beautiful recreational space along the Mississippi River in St. Paul, just across the river from

Future plans call for connecting the trail to the developing Robert Pira Regional Trail, which in turn is part of the larger Mississippi River Trail, a network of interconnected trails that will one day reach from Minnesota to the Gulf of Mexico.

Harriet Island Regional Park offers a beautiful recreational space along the Mississippi River in St. Paul, just across the river from downtown. A paved trail runs the length of the park spanning just shy of a mile. Picnic tables, a playground, and restrooms are available within the park and trail users are treated to views of the river and the city's skyline. Travelers can also continue into the neighboring Cherokee Regional Park to access more amenities.

The Harriet Island trail begins at the Wabasha Street Bridge and travels southwest to its end at the Smith Avenue Bridge. Trail users can cross either bridge to reach the [Samuel H. Morgan Regional Trail](#), which traces the Mississippi River's opposite bank.
