Newark Trail

Ohio

Beginning at a connection with the T. J. Evans Trail, this 3-mile paved pathway heads through Newark's western neighborhoods

Beginning at a connection with the [T. J. Evans Trail](#), this 3-mile paved pathway heads through Newark's western neighborhoods along the scenic Raccoon Creek to Flory Park. For much of the route, the trail parallels the south side of State Route 16, though there is a wide median and fencing between the roadway and the path.

Approaching its eastern end, the trail offers access to the J. Gilbert Reese Bridge, a pedestrian crossing over SR 16. If you take that spur, you will follow a paved trail north to the Ohio State University at Newark campus. If you don't take the bridge and continue east, the Newark Trail ends just a stone's throw from the Licking County Family YMCA.

Newark Trail

Ohio

States: Ohio

Counties: Licking

Length: 3.3miles

Trail end points: Flory Park to T. J. Evans Trail,
just south of Reddington Road
