True to its name, the Niagara Gorge Rim Trail traces the eastern edge of the Niagara Gorge, offering connections to three state parks and spectacular views of the Niagara River below and the surrounding city skyline.

For much of the journey, the paved pathway parallels the Niagara Scenic Parkway, providing access to Devil's Hole State Park, Whirlpool State Park and Niagara Falls State Park. The trail crosses the river on a pedestrian bridge over Goat Island, nestled in the channel leading to American Falls, and ends along the northwestern shoreline of Goat Island.

Nearby, travelers can also explore the [Great Gorge Railway Trail](#), [Devil's Hole Trail](#) and [Niagara Scenic Parkway Trail](#).
